

# CURRICULUM VITAE

---

## **Andrew Newell**

I work in labour economics and historical economics. Over my career, I have worked on: West European unemployment; the labour market evolution of East European and Central Asian countries in transition from communism and on labour and household issues in developing countries. Main current projects are an ESRC-funded study of the rise of living standards and changes in global economic inequality in the late 19<sup>th</sup> and early 20<sup>th</sup> centuries and studies of labour market transitions of young women in Sub-Saharan Africa.
